REFERENCE(S)

There is no information available locally other than that reported in the *oee* dailies and weekly on the status of Sino-Soviet Bloc aircraft production. Questions arise concerning the production of specific factories and/or types of aircraft. It is requested, therefore, that this station be put on distribution for copies of I/AR's Quarterly Estimates of Aircraft Production. It is realized that this estimate does not necessarily reflect the official USIB or Air Force estimates; nevertheless the material contained in it will be most useful for our background information and of considerable assistance in interpreting current developments in the industry.
